## Bridgeman AXSN Series (Single Nose Locks)

**Advanced design, rugged construction, improved security**

Today's new standard in safe deposit boxes has been developed by Bridgeman Security Equipment. . . . the innovative company specializing in institutional security since 1955.

### Bond Boxes

Metal bond boxes are furnished in all sizes. Boxes are constructed from sheet metal and finished in a grey powdercoated enamel finish.

### Number Plates

Glare-resistant matte finish number plates are recessed into a special frame which compliments the stainless steel and anodized aluminum finishes.

### Construction

The Bridgeman AX series of safe deposit boxes combines 1/2" solid alloy doors faced with stainless steel with cabinets of powder coated rust-resistant steel. For high security, the doors are designed with a heavy flange which interlocks with the door jamb.

### Single Access Locks

As standard, doors are fitted with a U.L. listed single nose lock for self service use.

### Bases

Constructed of heavy duty tubular steel and finished in stainless steel to match the boxes. Standard bases are 3" high and equipped with leveling legs.

All specifications subject to change without notice. All cases are furnished with number plates and locks with keys ready for use. All dimensions indicated for the drawings are for outside measurements only.
