

Model 521 Remote Drive-Thru System

ComCo's 521 is a stylish, quiet and advanced drive-thru system – at an economical cost.

Model 521 Remote Drive-Thru System

Patented air circuit requires less service and maintenance since there are no moving parts

Dual customer controls for both compact autos as well as large SUVs and trucks

The innovative audio design filters background noises enhancing only voice frequencies

Optional Customer Video Module with 10" LCD Monitor

The model's patented "Silent System" has almost no blower noise

TRANSPORT COMMERCIAL OR RETAIL TRANSACTIONS WITH ONE SIMPLE, FAST AND ECONOMICAL SYSTEM

Decades of research and design enables ComCo to introduce the most economical, highly advanced and stylish system in the drive-thru retail environment today - The 521 Remote Customer System.

The sleek drive-thru customer unit quickly moves information with its unique, patented "Silent System" delivering information so quickly and smoothly, the customer will hardly hear it operating until the carrier arrives. Two sets of "CALL" and "SEND" touch-sensitive switches provide added functionality for easy access from both smaller compact vehicles as well as larger SUVs and trucks.

- **Faster air system increases productivity, uptime and customer satisfaction.**
- **Quieter air system with patented air circuit.**
- **Dual customer controls for easier access from large SUV's, trucks or smaller sedans and compact cars.**
- **Innovative style and design make this smaller unit more efficient with easy visibility.**
- **Less service and maintenance since there are no moving parts in the customer unit.**
- **Optional, new slimline customer video module with new and improved 10" LCD monitor.**

* Integrated audio and video communication systems available with all packages.

Integrated Solutions is ComCo's exclusive series of modular products that seamlessly integrate into a highly-productive backroom teller center.

*Equipment design subject to change without notice.

INNOVATION AT WORK.

Model 521

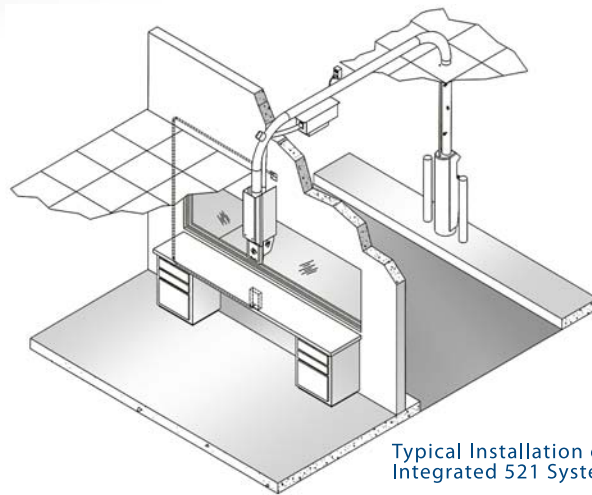

Remote Drive-Thru System

Integration At Work...

For more than 40 years, ComCo has pioneered operations center design with innovative pneumatic products that automate delivery and streamline communication. ComCo has designed more multi-access designs than any company in the industry.

The Model 521 Remote Drive-Thru system is a fully-integrated multi-access drive-thru system that combines versatility and function. Its unique, patented "Silent System" delivers information so quickly and smoothly, customers will hardly hear it operating until the carrier arrives.

The 521's modular design enables you to customize operator and customer components into a unique solution that's just right for your facility. With a host of coordinated options and accessories, it's easy to design-build a drive-thru system that fits your unique needs.

Typical Installation of Integrated 521 System

Model 521 Customer Unit

- Attractive, slim styling with soft delivery inside and out.
- Simple and efficient operation with no moving doors or parts.
- Superior audio and video clarity. The innovative audio design filters background noises enhancing only voice frequencies.
- Patented air circuit that's faster and quieter than other models.
- Easy service and maintenance.
- Dual customer controls for easier access from large SUVs, trucks or smaller sedans and compact cars.

Model 521 Operator Unit

- The unique Dual-Side Operator Unit allows for increased operator efficiency and comfort since the carrier can be retrieved from nearly any angle.
- The Single Operator Units are designed to be mounted side-by-side with full access through the front cover for easy maintenance (if needed).
- Wall and ceiling suspended units require no counter space, and they are positioned at a comfortable carrier arrival height for operators.
- The 521 units are easy to operate with a simple "CALL" and "SEND" switches.
