COMCO'S LTS 1000 PRIVATE VIDEO TRANSACTION SYSTEM REDUCES TRANSACTION TIME, INCREASES SECURITY, AND PROVIDES EYE-CATCHING WALK-UP APPEAL.

The ComCo LTS Series Private Video Transaction Pneumatic Tube System offers a new, highly efficient way to deliver customer services while maintaining the "personal touch" afforded by face-to-face contact with your customers.

The ComCo LTS 1000 units are totally front-accessible for convenience and ease of maintenance should service ever be requires.

The LTS Series offers many advantages to the financial community and to their customers.

- **IMPROVE EFFICIENCY BY REDUCING TRANSACTION TIME PER OPERATOR.**
- **INCREASED SECURITY BY REMOTELY LOCATING OPERATORS AND ACCESS TO CASH.**
- **OPTIMIZE STAFFING DURING PEAK AND OFF PEAK PERIODS.**
- **EXTENDED BUSINESS HOURS AT LOWER OPERATING COSTS.**
- **ADDITIONAL MARKETING OPPORTUNITIES THROUGH OUR INTEGRATED GRAPHICS AND VIDEO ADVERTISING OPTIONS.**

* Integrated audio and video communication systems available with all packages.

Integrated Solutions is ComCo's exclusive series of modular products that seamlessly integrate into a highly-productive backroom teller center.

*Equipment design subject to change without notice.

INNOVATION AT WORK.

Model LTS 1000

Video Transaction System

Integration At Work...

Comco Systems is the pioneer in Integrated Operations Center design. We have deployed more multi-access designs for pneumatic tube systems than any other company in the industry. Our diversified pneumatic tube systems, product line, patented designs and experienced engineering service group, enable us to create the optimum solutions for you.

Using our unique Operator Terminal designs, the Operations Center integrates pneumatic tube Delivery from the lobby, drive-thru, Customer service and other Locations requiring processing. Our integrated pneumatic tube system designs offer innovative and flexible layouts that increase operator efficiency and comfort as well as improved space planning.

Integrated Products

The versatile LTS 1000 Private Video Transaction System can be installed as a part of a unique Integrated System using a wide variety of ComCo Operator Units providing a bottom-line improvement in safety, convenience and increased productivity.

Many of the ComCo Operator Units are long standing components of the Integrated Operations Center solutions. One of the latest innovative possibilities is the new "OPEN ACCESS" operator terminals that eliminate doors at the operator station.

The unique and versatile Single-Sided "Doorless" chute designs now deliver carriers with speed, convenience and full access to the carriers. With ComCo's patented air circuit technology, open chutes can be used as operator terminals instead of the larger terminals that blocked so much of the operator's view. The open chutes are designed with a minimum of view obstructing material along with clear tubing allowing for virtually no obstruction between the operator and their customers.
