clear touch™

security with style

## SECURITY WITH STYLE

Introducing the first real alternative to security keypad design in decades—the revolutionary new Clear Touch™. From its sleek glass form, to an intuitive, user-friendly interface, Clear Touch blends design and usability to take a leap forward in keypad innovation. Easy to use and rich in security features, Clear Touch delivers the same value you have come to expect from our security technology—and it delivers with style.

## SECURITY IN A WHOLE NEW LIGHT

No longer must a beautiful décor be compromised by a dated, clunky keypad. When touched, the Clear Touch screen activates its cool blue glow. In the event of an alarm, Clear Touch transforms to a brilliant red, visually notifying users that the system is in alarm. Instant visual notification provides added security to systems when audible notification has been purposely silenced.

A close-up photograph of a hand with a red sleeve touching a glass security keypad. The keypad has a blue screen displaying the text 'CONF ROOM' and 'ALL SYSTEM ON'. To the right of the screen is a numeric keypad with buttons 1-9, 0, and a star key. The keypad is mounted on a wall and has a glowing blue light effect around it.

*The glass Clear Touch™ keypad  
is easy to see, easy to use,  
and of course, easy on the eyes.*

*The glass Clear Touch keypad changes from blue to red during an alarm. Distinct sound patterns indicate alarm type, providing users with an audible as well as visual alert.*

## THE STRONG SILENT TYPE

Most security systems shut down as soon as you've silenced the alarm, making unarmed areas vulnerable to second-wave intrusion. But not Clear Touch. To ensure ongoing security monitoring after your system goes into alarm, Clear Touch automatically silences the alarm without disarming the system – prompting the user to cancel or verify the alarm.

## ALARMINGLY SIMPLE

A good alarm system shouldn't require a degree or textbook to comprehend. Instead, arming or disarming is fast and easy with Clear Touch. Thanks to convenient shortcut keys and user-friendly icons, users can send Panic, Emergency or Fire alarms to the monitoring station with one-button simplicity. Easy-to-use menus eliminate searching through complex commands and instantly put you in touch with system status and arming levels. And versatile user controls conveniently allow the user to adjust backlighting brightness, speaker tone, and volume. Because Clear Touch is designed for easy operation, it is the ideal solution for any home or office.

*Clear Touch is designed with children, parents and grandparents in mind – so it's easy to use. Instead of demanding a complex series of keystrokes, simple menus guide users through system operation.*

## MORE THAN MEETS THE EYE

The revolutionary Cancel-Verify command allows users to instantly notify the central station that an alarm is a true emergency, and enables the central station to dispatch immediately, without the need to call and verify the alarm. And it only gets better with the Home-Sleep-Away feature that arms specific areas of the property with one-touch command.

And Clear Touch is so smart, it can display messages in more than one language!

## QUALITY ASSURED

Clear Touch is backward & forward compatible so you can upgrade or expand your existing system with new components without paying for a new system. When you want to take advantage of new features, you can build on what you already have. And to ensure reliability, Clear Touch is made, tested and quality inspected in the USA.

*With instant panic keys, exclusive Cancel-Verify feature, and Home-Sleep-Away arming, Clear Touch is today's most intuitive keypad.*

■ User-friendly, intuitive interface

■ Sleek, sophisticated design

■ 32-Character display

■ Cancel-Verify feature

■ Durable, easy-to-clean, easy-to-see glass screen

■ Turns red in alarm state to visually indicate an alarm
