

Increased Peace of Mind

An alarm system monitored by EMERgency24 is one of the best ways to protect people, pets and property should there ever be an intrusion, fire, medical emergency, gas build-up, water leak or almost any other catastrophic event.

Having a team of trained monitors prepared to handle any signal that comes from your security system ensures a fast response when it is needed most. Even when you are not at home, emergencies are addressed immediately.

This provides around-the-clock protection for family heirlooms, irreplaceable photos, important documents, financial data, original artwork and much more.

Electronic Alarm Notification

EMERgency24 can notify property owners electronically when an alarm event happens so they can address the situation immediately, regardless of their location. Alarm notification messages can be sent to a cell phone via text messaging or to an email account.

Solutions for VoIP

EMERgency24 offers several security solutions for property owners who have migrated to VoIP phone service, which often impacts the functionality of an alarm system.

Who We Monitor

EMERgency24 monitors alarm systems for every type of facility and subscriber across the U.S. including: Residential, Commercial, Industrial, Government, Military, Hospitals, Chemical Plants, Agricultural Operations and High-Security Installations such as Financial Institutions, Jewelry Stores and Pharmacies.

Insurance Discounts

EMERgency24 meets or exceeds all UL requirements. UL representatives randomly inspect all listed facilities to ensure ongoing compliance. You may be eligible for a discount on your property insurance when you report that your property is monitored by a UL-listed central station.

New UL-Listed Central Station Headquarters

Your security specialist chose EMERgency24 to monitor your alarm system because of our speed-of-response, reliability and experience. Our UL-listed facility and alarm monitoring software were designed by our in-house staff of engineers and programmers.

Every UL requirement must be met at all times, thus ensuring that property owners always receive the ultimate level of protection.

Security for Homes & Business

While there is always a chance a home or business will be affected by crime, fire or other unforeseen events, an EMERgency24-monitored security system can significantly minimize the impact of the incident.

That's because EMERgency24 operators respond to alarm signals and dispatch the appropriate emergency responders should help ever be needed.

Dedicated to Developing the Next Generation of Technology

As the leading technical innovator in the industry, we are guided by a sense of responsibility to continuously seek and develop the next generation of security services for home and business owners.

Some of our most recent offerings include:

- Smart Home Automation Technologies
- Personal Emergency Response Services
- Wireless Remote Video Monitoring
- Website and Internet Server Supervision

About EMERgency24

Since 1967, EMERgency24 has been the leader among central station alarm monitoring

companies by streamlining the emergency dispatching process through innovative use of technology.

EMERgency24 remains ahead of the technological curve by staffing in-house programming and engineering expertise. This allows us to respond to almost any customer need in a timely manner.

That's why EMERgency24 has consistently been rated the "most preferred" central station by alarm dealers across the nation.

Five Locations Nationwide

To supplement our headquarters in Chicago and ensure functionality even if a natural disaster should happen, EMERgency24

operates a redundant network of central station

monitoring centers across the United States, with branches in Washington D.C., Detroit, Los Angeles and Milwaukee.
