

E-SERIES SLIM- 960H EMBEDDED RECORDERS

OE-ESLIM4

OE-ESLIM8

OE-ESLIM16

DESCRIPTION

OpenEye's E-Series Slim 960H recorder is a powerful and affordable video management solution designed for easy installation and operation. E-Series Slim recorders are available in two compact chassis sizes, and still provide the detail and the power you need, even in a small space.

Recording at 960H resolution provides an image 30% more detailed than standard D1 images, provided by most analog CCTV cameras and recorders. While a 960H camera is required for full benefit of this resolution, the E-Series Slim uses this technology to provide images with higher resolution and more color saturation, even with standard analog cameras.

Multiple remote users can view, search, and backup data for off-site video storage as well as configure the recorder and perform remote software updates using RADIUS video management software.

Built with the quality and expertise users have come to expect from OpenEye, the E-Series Slim is up to the task for your next surveillance installation.

INSTANT BACKUP

Incidents can take a monetary and emotional toll, and reporting them to law enforcement in a timely manner is important. With the convenient Instant Backup feature, you can export video quickly and efficiently after an incident for prompt response and a fast resolution.

HIGH RESOLUTION

E-Series Slim recorders include HDMI outputs and support resolutions up to 960H. With up to 33% more detail in recorded and live video, you can be sure you're capturing all of the visual information of any scene.

COMPACT DESIGN

E-Series Slim recorders provide all of the functionality of full-size embedded recorders from OpenEye in a smaller size. With two available sizes to choose from, up to 16 channels, and up to 8TB of video storage, the E-Series Slim provides the detail and the power you need, even in a small space.

EASY TO USE

OpenEye strives to create easy-to-use products, and all E-Series recorders are designed to be intuitive to set up and operate. With the Quick Setup feature, your surveillance system is ready to record in seconds, and Quick Search and Quick Backup save time finding and saving recorded video.
