

FINANCIAL & BANKING SOLUTIONS

**PACOM**

...innovates

For more than 20 years, Pacom has developed innovative technology solutions designed to ensure that our customers, many of whom include the world's largest banking and financial organisations, can effectively manage their security solutions.

The cornerstone of the Pacom solution is reliability, ensuring that your system will continue to operate through critical events, delivering bullet-proof reliability and undeniable performance. Dependability and consistency are at the core of Pacom's technology culminating in a solution that will continue to operate, regardless of the environment.

#### PACOM FINANCIAL SOLUTIONS AT A GLANCE

- > **PACOM** reduces false alarm rates to less than 1%.
- > **PACOM** boasts customer partnerships that span more than 15 years.
- > **PACOM** delivers unrivalled reliability no matter what the situation.
- > **PACOM** interfaces with virtually any existing or new product or technology

“ The Pacom solution...thanks to its strength and stability, has permitted us to save significant costs... and remove recurring costs associated with monitoring and administration. ”

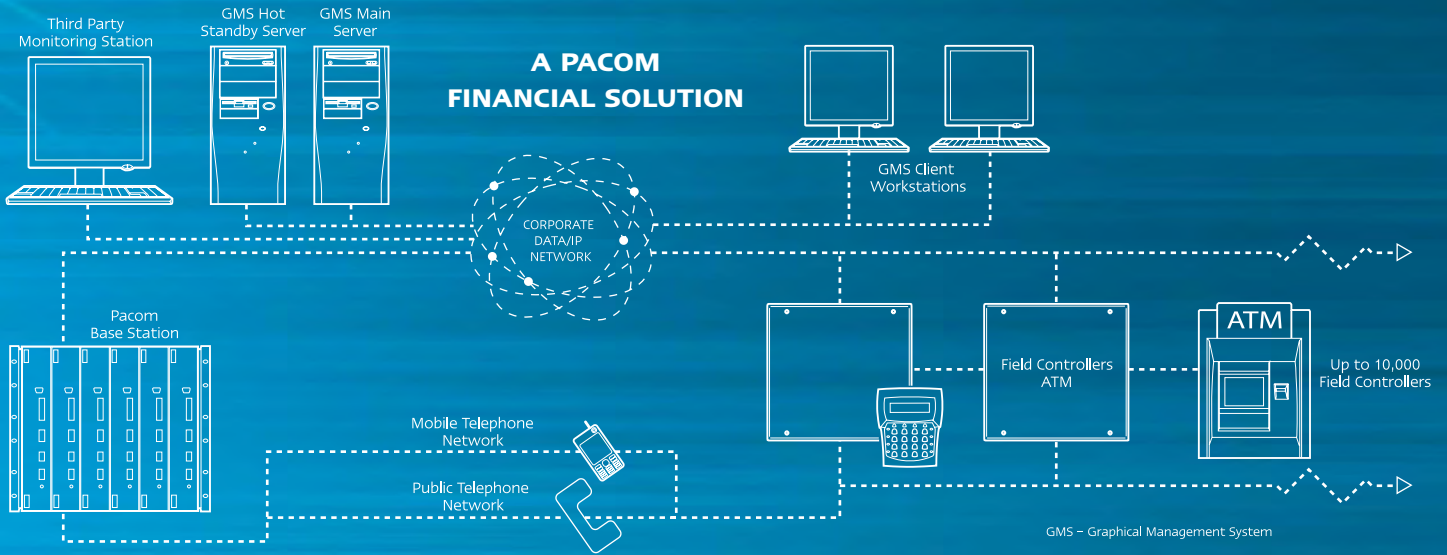

Juilon Flores Alva, Central Administration Security, Banco Del Credito del Peru

“ Pacom's overall performance is excellent. The panels are almost bullet proof in the way they continue to operate under any condition. That dependability is a strong plus for PACOM. ”

Jay Baker, Security Systems Supervisor, Guaranty Bank.

**PACOM**

**YOU'RE IN CONTROL**

Our powerful management software (GMS) allows banking and financial customers remote, real-time, at-a-glance control of all branches, ATMs and corporate offices. Change PIN codes and users; print access cards; centrally configure individual alarm panels; remotely broadcast upgrades and changes with one keystroke eliminating the need for site visits; verify alarm events immediately with integrated digital video capabilities; search and report easily on one specific site or event or generate

customised reports from thousands of sites – and do all of this from anywhere on the network. Pacom's technology adapts based on the requirements for each individual institution.

**ROI IN 2 YEARS**

Best of all, customers usually have ROI within two years. Pacom's solution uses the customer's internal IP network and therefore requires no dedicated telephone lines. By enabling remote management, the need for site visits is almost non-existent and the customer can manage the system internally, removing the operational cost of external management contracts.

**A FOUNDATION FOR TOMORROW**

Pacom provides a strong security foundation that seamlessly copes with the requirements of today while adapting quickly to the expanding needs of tomorrow, no matter what they may be.

Pacom's versatile, robust solutions interface with all leading brand digital video systems, video monitoring, intrusion panels and wireless devices, which means that our solutions are a truly open system that can integrate at every level; providing reliability while maintaining versatility.

RELIABILITY > INTEGRATION > FLEXIBILITY > PERFORMANCE
