**Setting the Course for Intelligent Deposit**

**WINCOR**  
**NIXDORF**

*Intelligent Deposit from Wincor Nixdorf enhances transaction performance and builds customer confidence, making your financial institution more competitive and profitable. Get ready to take your ATM channel to the next level of strategic importance.*

# INTELLIGENT DEPOSIT GETS YOU THERE

## Increase Customer Confidence

As self-service becomes commonplace at airlines, hotels and retailers, banks can now offer an intuitive experience that simplifies deposit transactions.

Wincor Nixdorf ATMs offer the first proven solution to accept bulk check deposits automatically. Customers can deposit up to 50 checks (and notes) at one time without an envelope.

With deposits no longer "stuck in the envelope," customers can have immediate access to deposited funds. And by seeing the check images on the ATM screen or a printed receipt, they have increased confidence in the transaction.

## Streamline Operations

Making your ATMs do the heavy lifting on simple transactions frees your tellers to focus on higher value services—like loans, credit cards and investments.

- Reduce cash handling and check processing expenses
- Eliminate costly fraud from empty deposit envelopes
- Improve float management

## Get Ahead of the Competition

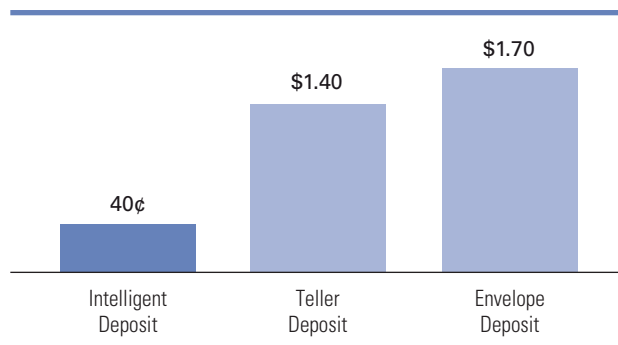

In the competitive banking industry, you must constantly offer new, breakthrough services to enhance loyalty, prevent defection and acquire new customers.

When other banks are still using the time-consuming "one-check-at-a-time" process, you can install our bulk check intelligent deposit solution to give your merchant customers maximum convenience. Save time for all your depositors and gain more commercial and retail customers.

*Fast transactions. Intelligent Deposit. Happy Customers.*

## COST PER TRANSACTION

Estimates provided by TowerGroup Inc.

**TowerGroup reports the U.S. banking industry could save over \$2 billion a year by automating ATM deposits.**

## How it Works

**Turn your ATMs into intelligent deposit stations with our Cash/Check Deposit Module (CCDM).**

Unlike ATMs that offer only a single-check scanner, the CCDM processes multiple checks at a time in the same slot—no deposit slips, multiple check feeds or envelopes required. Customers can also directly deposit their cash earnings. And talk about fast—it scans three bills per second and a check per second. You can customize it to your business; our CCDM component can be added to all of our full-function ATMs.

## A Success Story

**Your customers don't want to wait. Now they don't have to.**

Meet Maria. As a busy store owner, Maria can't afford to close up shop to make deposits with a bank teller. But making after-hours ATM deposits means Maria doesn't have immediate access to her money, and standing in the dark feeding in checks one-by-one doesn't make her feel safe or confident.

Enter Wincor Nixdorf's CCDM. If her bank had this capability, Maria could swing by the ATM on her way home after closing. She could deposit her stack of checks from the day's sales in less than a minute, with fast and accurate accounting of the deposit and immediate access to her cash. Maria would have more time to focus on growing her company, which just might include a small business loan.

Maria doesn't want to wait. And now, you don't have to wait either. Bulk check deposit capability is finally here.

Find success with Wincor Nixdorf. We are redefining the way that bank's do business one inspiration at a time.

## PARTNER WITH US

Call us today at (800) 881-7426 for a full business analysis and custom retail ATM strategy or visit us online: [www.wincor-nixdorf.com/usa](http://www.wincor-nixdorf.com/usa)

### With You Every Step of the Way

Service and support is a high priority for Wincor Nixdorf. We have a growing service team dedicated to ensuring your implementation goes smoothly and integrates effectively with your existing infrastructure. We accelerate your path to maximum return on your ATM investments.

### Customized Success

In today's highly competitive banking world, we know you need to reduce costs and increase profit—quickly and efficiently. We conduct a comprehensive analysis to determine the most effective solutions for your business. We help you predict future profitability of automated solutions, based on increased productivity and annual savings.

### An Experienced Global Leader

Powered by German engineering and precision manufacturing, our hardware, software and services offer you a range of powerful, proven retail and financial solutions. Why rely on a beta version from another vendor when you can get a market-tested solution from Wincor Nixdorf?

You can feel confident working with Wincor Nixdorf. We are one of the world's top three suppliers of ATMs; the #1 provider of cash recycling and intelligent deposit solutions; and the premier provider of multi-vendor software solutions in the world.

**Now that's experience you can bank on.**
