# Yes. Your Customers Are Skimming Targets.

Professional Anti-Skimming Solutions

## What is Skimming?

Skimming devices are those that illegally record personal identification and financial information from the magnetic stripe of credit and debit cards. These devices include skimmer card readers and even hidden ATM cameras!

**There are more than 400,000 ATMs in the U.S.\***

- They generate \$1 trillion cash transactions annually.\*\*
- \$500,000,000 of this cash is obtained fraudulently by ATM Skimmers every year!\*\*

## ECS Detect

### For Dip Card Readers

Compatible with all ATM Brands

#### How ECS Detect Works

ECS™ Detect uses sensing technology to identify physical attacks on ATM dip card readers. If a skimming device is detected, the ECS module will report the attack via alert messaging. The attack will also be automatically logged in the management software system.

#### Solution Benefits

- ECS is a fully customizable solution that can be enhanced with features such as data logging, online geographical tracking with maps, and multi-language functions.
- Network system management portal for 24/7 real-time monitoring and management.

## ECS Dual

### For Motorized Card Readers

Compatible with all ATM Brands

#### How ECS Dual Works

ECS™ (Enhanced Card Security) is a patented anti-skimming product that deactivates skimming devices by generating disturbing frequencies as cards pass through card reader's throat—keeping confidential customer information safe!

#### Solution Benefits

- Data logging capability allows device status data to be stored and accessed remotely as well as electronically.
- Network system management portal with interactive map for geographical status tracking.
- Automated email communication with customized distribution.
- Device maintains ATM functionality in the event of skimming attack.
